

Question **1**

Correct

Marked out of  
5.00

Create a class `Mobile` with constructor and a method `basicMobile()`.

Create a subclass `CameraMobile` which extends `Mobile` class, with constructor and a method `newFeature()`.

Create a subclass `AndroidMobile` which extends `CameraMobile`, with constructor and a method `androidMobile()`.

display the details of the `Android Mobile` class by creating the instance. .

```
class Mobile{  
  
}  
class CameraMobile extends Mobile {  
  
}  
class AndroidMobile extends CameraMobile {  
  
}
```

expected output:

```
Basic Mobile is Manufactured  
Camera Mobile is Manufactured  
Android Mobile is Manufactured  
Camera Mobile with 5MG px  
Touch Screen Mobile is Manufactured
```

**For example:**

**Result**

```
Basic Mobile is Manufactured  
Camera Mobile is Manufactured  
Android Mobile is Manufactured  
Camera Mobile with 5MG px  
Touch Screen Mobile is Manufactured
```

**Answer:** (penalty regime: 0 %)

```
1 public class Mobile {  
2     Mobile() {  
3         System.out.println("Basic Mobile is Manufactured");
```

```

4      }
5  void basicMobile() {
6      System.out.println("Android Mobile is Manufactured");
7  }
8  public static void main(String[] args) {
9      AndroidMobile obj=new AndroidMobile();
10     obj.basicMobile();
11     obj.newfeature();
12     obj.AndroidMobile();
13 }
14 }
15 class CameraMobile extends Mobile {
16     CameraMobile() {
17         System.out.println("Camera Mobile is Manufactured");
18     }
19     void newfeature() {
20         System.out.println("Camera Mobile with 5MG px");
21     }
22 }
23 class AndroidMobile extends CameraMobile {
24     void AndroidMobile() {
25         System.out.println("Touch Screen Mobile is Manufactured");
26     }
27 }
28

```

|   | Expected  | Got   |   |

Question **2**

Correct

Marked out of  
5.00

Create a class known as "BankAccount" with methods called deposit() and withdraw().

Create a subclass called SavingsAccount that overrides the withdraw() method to prevent withdrawals if the account balance falls below one hundred.

**For example:**

**Result**

```
Create a Bank Account object (A/c No. BA1234) with initial balance of $500:
Deposit $1000 into account BA1234:
New balance after depositing $1000: $1500.0
Withdraw $600 from account BA1234:
New balance after withdrawing $600: $900.0
Create a SavingsAccount object (A/c No. SA1000) with initial balance of $300:
Try to withdraw $250 from SA1000!
Minimum balance of $100 required!
Balance after trying to withdraw $250: $300.0
```

**Answer:** (penalty regime: 0 %)

Reset answer

```
1 class BankAccount {
2     // Private field to store the account number
3     private String accountNumber;
4
5     // Private field to store the balance
6     private double balance;
7
8     // Constructor to initialize account number and balance
9     public BankAccount(String accountNumber, double balance) {
10         this.accountNumber=accountNumber;
11         this.balance=balance;
12     }
13
14
15
16
17     // Method to deposit an amount into the account
```

```
18 ▾ public void deposit(double amount) {
19     // Increase the balance by the deposit amount
20     balance+=amount;
21 }
22
23 // Method to withdraw an amount from the account
24 ▾ public void withdraw(double amount) {
25     // Check if the balance is sufficient for the withdrawal
26 ▾     if (balance >= amount) {
27         // Decrease the balance by the withdrawal amount
28         balance -= amount;
29 ▾     } else {
30         // Print a message if the balance is insufficient
31         System.out.println("Insufficient balance");
32     }
33 }
34
35 // Method to get the current balance
36 ▾ public double getBalance() {
37     // Return the current balance
38     return balance;
39 }
40 }
41
42 ▾ class SavingsAccount extends BankAccount {
43     // Constructor to initialize account number and balance
44 ▾     public SavingsAccount(String accountNumber, double balance) {
45         // Call the parent class constructor
46         super(accountNumber,balance);
47     }
48
49     // Override the withdraw method from the parent class
50     @Override
51 ▾     public void withdraw(double amount) {
52     ▾
```

Question **3**

Correct

Marked out of  
5.00

create a class called College with attribute String name, constructor to initialize the name attribute , a method called Admitted(). Create a subclass called CSE that extends Student class, with department attribute , Course() method to sub class. Print the details of the Student.

College:

`String collegeName;``public College() { }``public admitted() { }`

Student:

`String studentName;``String department;``public Student(String collegeName, String studentName,String depart) { }``public toString()`

Expected Output:

A student admitted in REC

CollegeName : REC

StudentName : Venkatesh

Department : CSE

**For example:****Result**

```
A student admitted in REC
CollegeName : REC
StudentName : Venkatesh
Department : CSE
```

**Answer:** (penalty regime: 0 %)

Reset answer

1 | `class` College

```
2 ▾ {
3   protected   String collegeName;
4
5 ▾ public College(String collegeName) {
6     // initialize the instance variables
7     this.collegeName=collegeName;
8 }
9
10 ▾ public void admitted() {
11     System.out.println("A student admitted in "+collegeName);
12 }
13 }
14 ▾ class Student extends College{
15
16     String studentName;
17     String department;
18
19 ▾ public Student(String collegeName, String studentName,String department) {
20     // initialize the instance variables
21     super(collegeName);
22     this.studentName=studentName;
23     this.department=department;
24
25 }
26 @Override
27 ▾ public String toString(){
28     // return the details of the student
29     return "CollegeName : " + collegeName + "\nStudentName : " + studentName + "\nDepartment : ";
30 }
31 }
32 ▾ public class Main {
33 ▾ public static void main (String[] args) {
34     Student s1 = new Student("REC","Venkatesh","CSE");
35     s1.admitted(); // invoke the admitted() method
36     System.out.println(s1.toString());
37 }
38 }
```

|   | Expected  | Got   |   |
|---|---|---|---|
